#### DECREES

#### ART. 1 – SELECTION FOR AWARDING 1 (ONE) POSTDOCTORAL POSITION CONTRACT

This document announces the selection process **IpD01/2025** for the formulation of a ranking for the awarding of n. 1 postdoctoral position contract in the scientific-disciplinary group GSD 10/ARCH-01 - ARCHAEOLOGY in the scientific-disciplinary sector SSD ARCH-01/D - Classical Archaeology, to perform the research on the topic **"The Image of Emperor Hadrian seen from the Eastern Provinces"**, **financed under the project "RESP – The roman emperor seen from the provinces. Imaging roman power in the cities of the empire (RIC EU 2014-2020 Horizon 2020 GA no.101002763)"**, **financed by EUROPEAN COMMISSION, project identification code GA 101002763, CUP B35F20002640006.**

The research program concerns (description of the research program within which the postdoctoral position contract holder will work): *the research focusses on the iconography of emperor Hadrian and of his wife Sabina in the provincial world, especially on the eastern side. It is based on the comparison between their images (including private portraits resembling Hadrian and Sabina), on different media, mainly sculpture and coinage, from the material and the typological point of views, also using 3D scans and casts of the originals. The main goals of this work are entering data on coins and sculpture into the RESP database, contributing to research, dissemination and publication activities of the project team and producing one publication dedicated to the subject.*

The purpose of the assignment that will be entrusted to the postdoctoral position contract holder will be (description of the activities that the postdoctoral position contract will have to carry out during the duration of the contract): *the study and analysis of the iconography of Emperor Hadrian and his wife Sabina in the Roman provinces, especially the eastern ones (Greece, Asia Minor, Crete, and Cyrenaica). The research focuses on the iconographic characteristics of the imperial image, both male and female, comparisons between the works, different media (primarily sculpture and coins), and local similarities/differences. The postdoctoral position's assignee is required to conduct preliminary bibliographic research on Emperor Hadrian and Sabina, analyze the iconographic characteristics of the portraits, and establish the relevant portrait typologies. In particular, a direct comparison between sculptural and monetary images will be crucial to highlight potential relationships and dynamics in the reception of metropolitan models by the provinces of the empire, also paying attention to any differences that may exist between the emperor and the Augusta. This research follows the working methodology adopted in the RESP project "Roman Emperor Seen from the Provinces." Therefore, the postdoctoral position's assignee is required to utilize digital technologies, especially the 3D scans created within the project, for the integrated analysis of the sculptural and numismatic portraits, as well as the inclusion of numismatic and sculptural materials in the project database. The study will also*

*include the casts made of the imperial sculptures, their characteristics, and the related 3D scans produced as part of the RESP project, as well as comparisons with private portraits similar to those of Hadrian and Sabina. The assignment will result in a final report outlining the defining features of the period under consideration and drawing general conclusions, along with an in-depth scientific article on one or more significant case studies.*

The postdoctoral position contract will have a duration of twelve months, with the possibility of extension in accordance with the law.
