Cluster 4: come è andato il 2022?

Il **success rate** della partecipazione italiana è diminuito drasticamente dal 2021 al 2022, **dal 20% al 12%:**

- In particolare, l'Italia **mantiene il terzo posto** sia in termini di posizionamento che contributo

- **Meno proposte vincenti** con partner italiani presenti rispetto al 2021

- **Meno coordinamenti italiani** rispetto al 2021

- **Stabile il rientro nazionale** rispetto al 2021

- Il **25%** della partecipazione italiana nel Cluster 4 è rappresentata da **pmi**, dato inferiore a quello europeo (29%).

Cluster 4: come è andato il 2022?

- Buona, in particolare, la partecipazione italiana su **destionation 4 -** Digital and emerging technologies for competitiveness and fir for the Green Deal (ma rientro solo al 5%)

- Buona anche quella su **destination 5 -** Open strategic autonomy in developing, deploying and using global space-based infrastructures, services, applications and data

- Il dato medio del **rientro rimane costante** tra il 7-11%, eccezione per **destination 1** «Climate neutral, circular and digitized production con rientro **del 14%**

TWO stages – Blind evaluation
## (2023, <u>solo Twin Transition e Resilience</u>)

Blind evaluation (in 1st stage)

- There is no evidence that the current proposal evaluation system is systematically biased.

- There are understandable concerns that evaluation experts may be swayed – perhaps unconsciously – in favour of proposals from well-known organisations in countries with better performing R&I systems.

- 'Blind' evaluation is a way to remove any real or perceived effect of such reputational bias.

- Experts evaluate without knowing the identity of participants.

- The work programme will include an additional admissibility criterion: applicants can not be disclosed in the narrative part of the proposal.

JRC – Joint Research Center

⌐ *JRC Mission: As the science and knowledge service of the Commission our mission is to support EU policies with independent evidence throughout the whole policy cycle.*

Policy neutral: has no policy agenda of its own

More than **50 large scale research facilities**
More than **110 online databases**
15 Knowledge & Competence Centres

About **2 800 staff**, nearly **70 %** of whom are **scientific/technical staff**

83 % of core **research staff with PhDs**

Over **1 100 scientific publications per year**

JRC in Cluster 4

JRC Support to Energy Intensive Technologies and Strategic Technologies value chains:

- Transition of the energy-intensive industries

- Raw materials value chain analysis

- Raw materials ecosystems (EIGL, Foresight)

JRC Support to Safe and Sustainable by Design Chemicals and Materials Criteria:

- To provide methodological guidance to applicant of the SSbD framework

- To evaluate the feedback received from MS and industry

- To refine and expand the current SSbD framework based on the input collected

JRC in HE – *General Annex*

- Where provided for in the **specific call conditions**, applicants may include in their proposals the possible contribution of the JRC but the JRC will not participate in the preparation and submission of the proposal.

- Applicants will indicate the contribution that the JRC could bring to the project based on the scope of the topic text

- After the evaluation process, the JRC and the consortium selected for funding may come to an agreement on the specific terms of the participation of the JRC.

- If an agreement is found, the JRC would accede to the grant agreement as beneficiary requesting zero funding and would accede to the consortium as a member

JRC in HE – *Involvement in actions*

JRC as Beneficiary [menzione nel topic]

- Requesting no contribution
- Signing the CA

JRC as a Non Beneficiary [NO menzione nel topic]

- light form of collaboration (e.g. agreement, membership in the scientific advisory board, etc.)

2023 | Cooperazione Internazionale

Non è possibile includere in alcuna modo la <u>Cina</u> in qualsiasi Innovation Action!

TOPIC	COUNTRIES
HORIZON-CL4-2023-TWIN-TRANSITION-01-40: Sustainable and efficient industrial water consumption: through energy and solute recovery (Processes4Planet partnership)	with countries advanced in the field
HORIZON-CL4-2023-TWIN-TRANSITION-01-42: Circular economy in process industries: Upcycling large volumes of secondary resources (Processes4Planet partnership)	with countries advanced in the field
HORIZON-CL4-2023-DATA-01-04: Cognitive Computing Continuum: Intelligence and automation for more efficient data processing (AI, data and robotics partnership)	Especially with Japan and S. Korea
HORIZON-CL4-2023-DATA-01-06: Coordination and Support of Cognitive Computing Continuum research and policy	Especially with Japan and S. Korea
HORIZON-CL4-2023-DIGITAL-EMERGING-01-11: Low TRL research in micro-electronics and integration technologies for industrial solutions	Especially with leading semiconductor countries (e.g. Japan, South Korea, Taiwan)

Non è possibile includere in alcuna modo la <u>Cina</u> in qualsiasi Innovation Action!

TOPIC	COUNTRIES
HORIZON-CL4-2023-SPACE-01-71: Scientific exploitation of space data	with countries active in space exploration and space science
HORIZON-CL4-2023-HUMAN-01-63: Provide for a strong and sustainable pool of experts for European Standardisation: attract the students of university/HEI	encouraged
HORIZON-CL4-2023-HUMAN-01-64: Pre-normative research and standardisation in industrial ecosystems	encouraged
HORIZON-CL4-2023-HUMAN-01-01: Efficient trustworthy AI - making the best of data (AI, Data and Robotics Partnership)	encouraged
HORIZON-CL4-2023-HUMAN-01-23: Supporting the emergence of an open human-centric Metaverse	in relation to interoperability and standardisation.

Cluster 4 Complementarities – European Partnerships

DID YOU KNOW?

European Partnerships are initiatives where the EU, together with private and public partners, commit to jointly support the development and implementation of a programme of research and innovation activities. The partners could represent industry, universities, research organisations, bodies with a public service remit at local, regional, national or international level or civil society organisations, including foundations and NGOs. Partnerships are not new – they were first introduced in 2002 as part of the European Research Area to overcome fragmentation of research effort.

3 Istitutional partnerships (Art.187, Public-Private)
EuroHPC JU
Key Digital Technologies JU (ex ECSEL JU)
Smart Networks and Services JU (ex 5G PPP)

Next call in 2023

7 Co-programmed partnerships
Made in Europe (ex FoF)
Process4Planet - Carbon neutral Circular Industry
Clean steel (ex SPIRE)
AI, Data and Robotics
Photonics
Globally competitive Space Systems (Proposed 2023)

1 Istitutional partnership (Art. 185, Public-Public)
European Partnership on Metrology

Next call in 2023
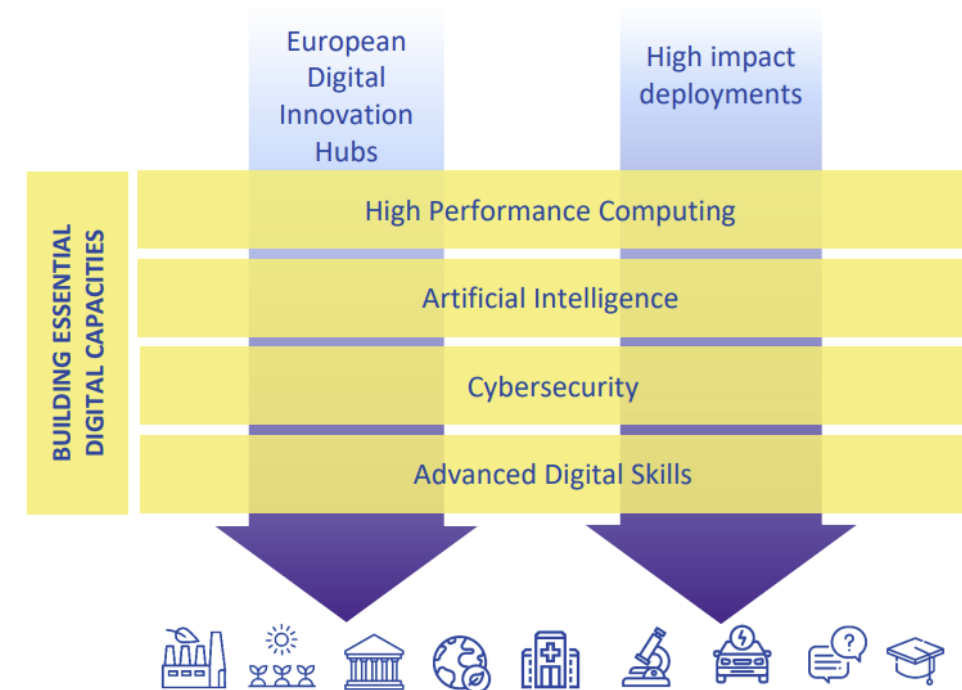

Cluster 4 Complementarities – Digital Europe

It will make use of the most recent research results, **but it will not support research**. For example, DE will support:

- The acquisition of HPC machines
- The set-up of sectorial data spaces, e.g. manufacturing
- The building or reinforcing of Testing and Experimentation Facilities
- The set up and delivery of Master courses in key advanced digital technologies

The programme has **specific restrictions to participation** of entities not in the EU or in the EEA.

Funding schemes:

- Grants with cost reimbursement 50% for everybody or with 75% for SMEs
- CSA at 100%
- Wider use of procurement

Cluster 4 Complementarities – Digital Europe

- The third call opened on **29 September.**

- The deadline for these calls is **24 January 2023** except for the European Digital Innovation Hubs which has a deadline of 16 November 2022.

- Cybersecurity call postponed.

- Second Work Programme (2023-2024) currently in preparation.

Digital Europe – Third Call for Proposals

Cluster 4 – Policy Framework

Policy and horizontal considerations

Open Science across the programme

Gender dimension in R&I content

Pathway to impact

Measures to maximise impact

Do no significant harm principle (DNSH)

Artificial intelligence

These aspects must normally be considered in all Horizon Europe calls (unless explicitly mentioned in the topic description).

Specific calls may include other aspects to take into account.

Policy and horizontal considerations

Trustworthy Artificial Intelligence

Due diligence su qualsiasi tecnica o sistema AI su affidabilità e robustezza:
- Robusta, accurata e riproducibile, in grado di gestire e informare su possibili guasti, imprecisioni ed errori, in relazione al rischio connesso al sistema o algoritmo AI
- Che tenga conto del contesto e dell'ambiente in cui opera
- Salvaguardia dell'integrità fisica e mentale delle persone
- Capace di spiegare il proprio sistema decisionale, specialmente se ha impatto sulla vita delle persone

Tre valutatori per la due diligence

1.2 **Methodology** #@CON-MET-OM@# #@COM-PLE-CP@# *[e.g. 14 pages]*

- Describe and explain the overall methodology, including the concepts, models and assumptions that underpin your work. Explain how this will enable you to deliver your project's objectives. Refer to any important challenges you may have identified in the chosen methodology and how you intend to overcome them. *[e.g. 10 pages]*

⚠️ *This section should be presented as a narrative. The detailed tasks and work packages are described below under 'Implementation'.*

⚠️ *Where relevant, include how the project methodology complies with the 'do no significant harm' principle as per Article 17 of Regulation (EU) No 2020/852 on the establishment of a framework to facilitate sustainable investment (i.e. the so-called 'EU Taxonomy Regulation'). This means that the methodology is designed in a way it is not significantly harming any of the six environmental objectives of the EU Taxonomy Regulation.*

⚠️ *If you plan to use, develop and/or deploy artificial intelligence (AI) based systems and/or techniques you must demonstrate their technical robustness. AI-based systems or techniques should be, or be developed to become:*

Climate neutral, circular and digitized production

1

⌐ **Destination 1: Climate neutral, Circular and Digitised Production: t**his destination will directly support the following Key Strategic Orientations (Orientamenti Strategici Chiave/Principali), as outlined in the Strategic Plan:

1. KSO C, '**Making Europe the first digitally led circular, climate-neutral and sustainable economy** through the transformation of its mobility, energy, construction and production systems.'

2. KSO A, '**Promoting an open strategic autonomy by leading the development of key digital, enabling and emerging technologies, sectors and value chains** to accelerate and steer the digital and green transitions through human-centred technologies and innovations.'

3. KSO D, '**Creating a more resilient, inclusive and democratic European society,** prepared and responsive to threats and disasters, addressing inequalities and providing high-quality health care, and empowering all citizens to act in the green and digital transitions.'

The focus can be, for example, on addressing demands in healthcare, automotive, maritime and aviation industries, energy generation or environmental areas.

The most relevant policies of the European Commission on this front are:
1. The <u>European Industrial Strategy of March 2020,</u> and in particular the <u>Update of May 2021</u>: there is now a renewed momentum in the EU to tackle its strategic dependencies as well as to boost its resilience across key strategic areas. The Covid-19 crisis revealed the importance of improving production response and preparedness of EU industry, in support of its long-term competitiveness.
2. The <u>Digital Decade</u> of March 2021, where the Commission presented a vision, targets and avenues for a successful digital transformation of Europe by 2030.
3. The <u>Circular Economy Action Plan</u> of March 2020 announced initiatives along the entire life cycle of products and aims to ensure that waste is prevented and the resources used are kept in the EU economy for as long as possible.
4. The <u>Fit for 55 Package of July 2021, delivering the EU's 2030 Climate Target on the way to climate neutrality,</u> given the process industries' 20% share of global greenhouse gas emissions.
5. The <u>Zero Pollution Action Plan</u> of May 2021 addresses both pollution and waste, where research needs could be tackled and is particularly relevant to advanced materials and the process industries, as well as to the manufacturing industry.

Destination 2: Increased Autonomy in Key Strategic Value Chains for Resilient Industry

⌐ This destination will directly support the following Key Strategic Orientations, as outlined in the Strategic Plan:

1. KSO C, '**Making Europe the first digitally-enabled circular, climate-neutral and sustainable economy** through the transformation of its mobility, energy, construction and production systems'

2. KSO A, '**Promoting an open strategic autonomy by leading the development of key digital, enabling and emerging technologies, sectors and value chains** to accelerate and steer the digital and green transitions through human-centred technologies and innovations'

3. KSO D, '**Creating a more resilient, inclusive and democratic European society**, prepared and responsive to threats and disasters, addressing inequalities and providing high-quality health care, and empowering all citizens to act in the green and digital transitions.

Proposals for topics under this Destination should set out a credible pathway to contributing to the following expected impact of Cluster 4:

Industrial leadership and increased autonomy in key strategic value chains with security of supply in raw materials, achieved through breakthrough technologies in areas of industrial alliances, dynamic industrial innovation ecosystems and advanced solutions for substitution, resource and energy efficiency, effective reuse and recycling and clean primary production of raw materials, including critical raw materials, and leadership in the circular economy.

The COVID-19, the war against Ukraine and other crises have shown that global competitiveness and resilience are two sides of the same coin. Whilst Cluster 4 addresses KSOs A, C and D, KSO B is becoming increasingly important, given the role of the industry highlighted in the zero-pollution action plan.

Destination 2: Increased Autonomy in Key Strategic Value Chains for Resilient Industry

⌐ The most relevant policies of the European Commission on this front are:

1. The <u>European Industrial Strategy of March 2020</u>, and in particular the <u>Update of May 2021</u>: there is now a renewed momentum in the EU to tackle its strategic dependencies as well as to boost its resilience across key strategic areas. The Covid-19 crisis revealed the importance of improving production response and preparedness of EU industry, in support of its long-term competitiveness. The Industrial Strategy Update and the accompanying Staff Working Document on strategic dependencies, showed that 99 products in the most sensitive ecosystems included materials on the list of critical raw materials.

2. The <u>Circular Economy Action Plan</u> of March 2020 announced initiatives along the entire life cycle of products. It targets how products are designed, promotes circular economy processes, encourages sustainable consumption, and aims to ensure that waste is prevented and resources used are kept in the EU economy for as long as possible.

3. The <u>Chemicals Strategy</u> for Sustainability of October 2020 strategy aims to better protect citizens and the environment whilst boosting the innovation for safe and sustainable chemicals. It calls for actions in the frame of research and innovation to develop a Safe and Sustainable by Design (SSdB) framework and criteria and a Strategic Research and Innovation Agenda addressing research and innovation needs raised in the Strategy and beyond..

Destination 2: Increased Autonomy in Key Strategic Value Chains for Resilient Industry

⅂ The most relevant policies of the European Commission on this front are:

1. The <u>Zero Pollution Action Plan</u> of May 2021 set's out the objective that by 2050 air, water and soil pollution shall be reduced to levels no longer considered harmful to health and natural ecosystems, that respect the boundaries of the planet. The action plan aims to strengthen the EU green, digital and economic leadership, whilst creating a healthier, socially fairer Europe and planet. It provides a compass to mainstream pollution prevention in all relevant EU policies, to step up implementation of the relevant EU legislation and to identify possible gaps.

2. The <u>Materials 2030 Manifesto</u> will enable the green and digital transition, anchoring on good design principles, combined with synergies between advanced materials, circularity, digital and industrial technologies. It calls for the evolution of materials research by uniting digital and material capacities and competences, combining technology push with market pull and united actions at Member States level, to benefit from Europe's strength.

3. The <u>Digital Decade</u> of March 2021, where the Commission presented a vision, targets and avenues for a successful digital transformation of Europe by 2030.

4. The <u>Fit for 55 Package of July 2021, delivering the EU's 2030 Climate Target on the way to climate neutrality</u>, given the process industries' 20% share of global greenhouse gas emissions.

⅂ **Business cases and exploitation strategies for industrialisation**: This section applies only to those topics in this Destination, for which proposals should demonstrate the expected impact by including a *business case and exploitation strategy for industrialisation*.

Destination 3: World-leading Data and Computing Technologies

This destination will directly support the following Key Strategic Orientations, as outlined in the Strategic Plan:

1. **KSO A, 'Promoting an open strategic autonomy by leading the development of key digital, enabling and emerging technologies, sectors and value chains** to accelerate and steer the digital and green transitions through human-centred technologies and innovations.'
2. KSO C, '**Making Europe the first digitally led circular, climate-neutral and sustainable economy** through the transformation of its mobility, energy, construction and production systems

Proposals for topics under this Destination should set out a credible pathway to contributing to the following expected impact of Cluster 4 as set out in Horizon Europe Strategic Plan:

Globally attractive, secure and dynamic data-agile economy, by developing and enabling the uptake of the next-generation computing and data technologies and infrastructures (including space infrastructure and data), enabling the European single market for data with the corresponding data spaces and a trustworthy artificial intelligence ecosystem.

As data becomes the new fuel of the economy and a key asset to address our societal challenges, the EU cannot afford to have the data of its businesses, public sector and citizens stored and exploited largely outside its borders. This is affecting not only our economic performance but also our security, safety and sovereignty.

Destination 4: Digital & Emerging Technologies for Competitiveness and Fit for the Green Deal

⌐ This destination will directly support the following Key Strategic Orientations, as outlined in the Strategic Plan:

1. KSO A, '**Promoting an open strategic autonomy by leading the development of key digital, enabling and emerging technologies, sectors and value chains** to accelerate and steer the digital and green transitions through human-centred technologies and innovations.'

2. KSO C, '**Making Europe the first digitally led circular, climate-neutral and sustainable economy** through the transformation of its mobility, energy, construction and production systems

Proposals for topics under this Destination should set out a credible pathway to contributing to the following expected impact:

1. **Open strategic autonomy in digital technologies and in future emerging enabling technologies**, by strengthening European capacities in key parts of digital and future supply chains, allowing agile responses to urgent needs, and by investing in early discovery and industrial uptake of new technologies.

Destination 4: Digital & Emerging Technologies for Competitiveness and Fit for the Green Deal

⊐ Destination is structured into the following headings and main Topics, which group topics together with similar outcomes to address a common challenge:

1. European Innovation Leadership in Photonics

2. AI, Data and Robotics

3. Open Source for Cloud/Edge and Software Engineering Fundamentals to support Digital Autonomy

4. European leadership in Emerging and Enabling Technologies

5. Flagship on Quantum Technologies: a Paradigm Shift

6. Graphene: Europe in the lead

Destination 5: Open Strategic Autonomy in Developing, Deploying and Using Global Space-Based Infrastructures, Services, Applications and Data

Open strategic autonomy in developing, deploying and using global space-based infrastructures, services applications and data, including by reinforcing European independent capacity to access space, securing the autonomy of supply for critical technologies and equipment, and fostering the EU's space sector competitiveness.

This Destination is therefore structured along the following headings:
- 1. Foster competitiveness of space systems
- 2. Reinforce EU capacity to access to space
- 3. Evolution of services: Copernicus
- 4. Development of applications for Galileo, EGNOS and Copernicus and PRS and GOVSATCOM user activities
- 5. Innovative space capabilities: SSA, GOVSATCOM, Quantum
- 6. Targeted and strategic actions supporting the EU space sector

In addition, Other Actions related to this Destination cover:
1. the evolution of Sspace and ground infrastructures for Galileo/EGNOS;
2. actions preparing for the Secure Connectivity initiative proposed by the Commission in February 2022;
3. specific activities related to Space entrepreneurship ecosystems (incl. New Space and start-ups);
4. In-Orbit Demonstration and In-Orbit Validation.

Destination 6: A human-centred and ethical development of digital and industrial technologies

This destination will directly support the following Key Strategic Orientations, as outlined in the Strategic Plan:

1. **KSO D, Creating a more resilient, inclusive and democratic European society,** prepared and responsive to threats and disasters, addressing inequalities and providing high-quality health care, and empowering all citizens to act in the green and digital transitions

Proposals for topics under this Destination should set out a credible pathway contributing to the following expected impact:

1. A human-centred and ethical development of digital and industrial technologies, through a two-way engagement in the development of technologies, empowering end-users and workers, and supporting social innovation.

The rapid adoption of new technologies offers an immense potential for improved standards of living, safer mobility, better healthcare, new jobs, or the personalisation of public services. At the same time, it presents risks such as skills mismatches, digital divides, customer lock-in, or serious breaches of security or privacy
