

# SUMMER SCHOOL

San Floriano (Verona), June 24th – 26th 2019

## Valorization of by-products from agri-food supply chains for the development of functional ingredients, foods and nutraceuticals

The summer school will deal with the most up-to-date notions in the field of food by-products valorization applied to the development of functional ingredients, foods and nutraceuticals. In the contest of Villa Lebrecht, in San Floriano (Verona nearby), the students will attend talks given by experts in this field focusing on different aspects of the topics. A poster session with contributes of the participants will represent another important part of the event: some contributes selected by the scientific committee will be presented in a “flash” form to the audience.
