

Dalla Pozza curriculum vitae

PERSONAL DETAILS

Date and place of birth: March, 30 1979 – Verona, Italy.

Citizenship: Italian.

Work address: University of Verona, Biochemistry Section, Strada le Grazie 8, 37134, Verona, Italy.

Phone number: +39 045 8027174; **e-mail:** elisa.dallapozza@univr.it

EDUCATION

2008-present: Post-Doc fellowship, in Biochemistry laboratory at University of Verona.

2005-2007: PhD student in Human Oncological Pathology in Biochemistry laboratory at University of Verona. Title of PhD Thesis: “Molecular mechanisms of antitumor activity associated to zinc ion modulation in pancreatic adenocarcinoma cells”. Defence date: 23/04/2008.

2004: Degree in Agro-Industrial Biotechnology obtained 25/03/2004, at University of Verona with graduating mark 109/110.

RESEARCH EXPERIENCE

01/01/2018-present: Titular of post-doctoral fellows in the research program "Active Nano-targeted therapy against tumor stem cells deriving from pancreatic adenocarcinoma" at the University of Verona. I am studying pancreatic cancer stem cells in culture for long periods evaluating the cellular and stem characteristics to identify molecular targets.

01/09/2013 – 31/12/2017 Titular of two post-doctoral fellows in Prof. Marta Palmieri and Prof. Aldo Scarpa laboratory, University of Verona. In this period, I worked in the research program "Innovative methods for the detection of markers of early diagnosis of pancreatic cancer" financed with the AIRC 5x1000 funds. I have been involved in the study of pancreatic cancer stem cells with particular regard to characterization *in vitro* and *in vivo*, to secretome and proteome analyses, and in autophagic mechanism induced by p53-reactivating molecules and by UCP2 inhibition in pancreatic cancer cell lines.

01/01/2009 - 31/08/2013 Titular of two post-doctoral fellows in Prof. Marta Palmieri laboratory, University of Verona. In this period, I studied the effect and the molecular mechanism of many anti-tumoral compounds in pancreatic adenocarcinoma cell lines *in vitro* e *in vivo* also through the use of nanotechnological approaches.

01/01/2008 – 31/12/2008: Titular of research fellowship “Antonio Ferrari” fund by Associazione Italiana per la Ricerca sul Cancro (AIRC). Title of research fellowship: “Reactive oxygen species in gemcitabine induced pancreatic adenocarcinoma cell death: molecular mechanisms, biomarkers and drug sensitivity”.

TRAINING

- I attended training courses for the use of laboratory animals at C.I.R.S.A.L (University of Verona).
- I attended training courses for health and safety at work and for safety management and risk assessment in chemical and biological laboratories.

ACTIVITIES

- I was expert in the field of Biochemistry for sport at University of Verona for years 2008-2010 and 2013-2018.
- I was member of the scientific secretariat for the organization of the 27° Annual Congress of the Italian Association of Cell Culture, which was held in Verona in 12-14 November 2014.

THECNICAL SKILLS

Competence in cellular and molecular biology, and biochemical techniques: cell culture, cell transfection, confocal microscopy, western blotting, DNA and RNA extraction and purification, PCR, real time-PCR, enzymatic activity assays, bacterial transformation and cloning. Competence *in vivo* experimental.

PARTECIPATION TO NATIONAL/INTERNATIONAL MEETINGS

Author of twenty-six scientific poster presented at national and international congresses, two of these posters have received the award for Best Poster of the conference.

PARTICIPATION IN FUNDING PROJECTS

- Tumor microenvironment and tumor spread in gastrointestinal cancers (AIRC regional projects-Veneto 2008, with renewal 2013-2014, PI Prof. Donato Nitti).
- Effects of oxidative stress induced by gemcitabine and anti-tumoral synergism with cannabinoids in pancreatic cancer cells (Joint Project 2008; PI Prof. Massimo Donadelli).
- Verona Nano-Medicine Initiative (2010; PI Prof. Guido Francesco Fumagalli).
- Innovative tools for early diagnosis and risk assessment of pancreatic cancer (AIRC 5x1000, 2012-2017; PI Prof. Aldo Scarpa).

Active targeted nano-therapy against cancer stem cells derived from pancreatic adenocarcinoma (Joint Projects 2017; PI Prof. Marta Palmieri).
