Correspondence of Portuguese and European Grading Scales

In accordance with Article 19 of Decree-Law 42/2005 published on 22/02/2005 in the Official Journal of the Portuguese Republic under Section II (European grading scale), the correspondence between the European grading scale and the Portuguese grading scale is composed of 5 segments (classes), identified by the letters A to E.

In the 10-20 interval of the entire 0-20 numerical scale in use in Portugal, the European grading scale adopts the following correspondence:

A: grade $20 - p$, where p is the classification that incorporates, in this segment, 10% of the students;

B: grade $p-1$ to q where q is the classification that incorporates, in this segment combined with the previous segment, 35% of the students;

C: grade $q-1$ to r where r is the classification that incorporates, in this segment combined with the two previous segments, 65% of the students;

D: grade $r-1$ to s where s is the classification that incorporates, in this segment combined with the previous segments, 90% of the students;

E: $s-1$ to 10.

In applying the correspondence between the European grading scale and the Portuguese grading scale, as per the above-mentioned legal instrument, the distribution of classifications are calculated for a period of at least three years and for a sample of at least 100 students.
