Corso di dottorato in Neuroscienze, Scienze  
Psicologiche e Psichiatriche e Scienze del Movimento

Scuola di Specializzazione in Psichiatria

# **"Neurobiology of depression in pregnancy – consequences for the mothers and the child"**

**February 19, 2019 - h. 14.30**

**Carmine M. Pariante**  
**Professor of Biological Psychiatry**

Institute of Psychiatry, Psychology and Neuroscience,  
King's college, London (UK)

## **Abstract**

Starting from the general biology of the stress response, and the prominent role of cortisol and inflammation, Professor Pariante will discuss the evidence that these same biological mechanisms are operating in the programming of baby's development under condition of maternal stress, and thus in the transmission of the risk of psychopathology from one generation to the next

---

The seminar will take place at **14.30 – Aula B – Lente didattica Policlinico G.B Rossi**
