

When idioms split open: a notable case of lexical dynamics

Alain Polguère is Professor in linguistics at the Université de Lorraine (Nancy, France) and member of the ATILF-CNRS laboratory of Nancy where he heads the Lexicon team. In this context, he pilots a research on lexical networks called *Lexical Systems* which are new computational models of natural language lexicons based on theoretical and descriptive principles of Explanatory and Combinatorial Lexicology. He is a senior member of the IUF (Institut Universitaire de France) and is the co-director of the scientific journal *Cahiers de lexicologie*. Coauthor of *Introduction à la lexicologie explicative et combinatoire* (with I. Mel'čuk and A. Clas, 1995), of the fourth volume of the *Dictionnaire Explicatif et Combinatoire du Français Contemporain* (1999), of *Lexique actif du français* (with I. Mel'čuk, 2007), Alain Polguère is the author of numerous articles and of the book *Lexicologie et sémantique lexicale. Notions fondamentales* (first edition in 2003; second edition in 2008; third edition in 2016) which obtained the Minister's price in the Competition for the Minister of Education's Awards 2003-2004 (Québec, Canada), with a Special mention for the quality of the language.

Lectio Magistralis

**Prof. Alain
POLGUÈRE**
