UNIVERSITÀ di VERONA

PhD Course on "Presenting a scientific paper"

Prof. Roberto Giacobazzi

Abstract

The course will introduce some methods and techniques to make the presentation of a scientific paper slightly more appealing and possibly more efficace in communication. We will consider conference-like talks with slides, characterised by short time and wide heterogeneous audience. After an introductory lecture (nearly 2h) each student will make a 15/20 min talk on a chosen subject. The subject is chosen by the student and can be an already made talk or a talk planned to be made or a totally new talk. The talk is intended as a typical conference talk.

During the talk we will discuss possible improvements in the design, structure and way the presentation is made.

Maximal number of students allowed in this module: 25.

Class Meeting

Lunedi 11 Marzo: 9.00-11.00   Aula L

Giovedi 14 Marzo: 16.30-18.30   Aula H

Giovedì 21 Marzo: 16.30-18.30   Aula H

Lunedi 25 Marzo: 16.30-18.30   Aula G
