**Aula "Irene Dal Forno"  
Istituti Biologici  
Università di Verona**

Günter Klöppel is distinguished for many important contributions to the pathology of the pancreas and of neuroendocrine tumours. His most important contributions were to research on the neonatal nesidioblastosis, the precursor lesions of pancreatic carcinoma and their molecular progression, the description and classification of special pancreatic tumour types, the pathogenesis of alcoholic and autoimmune pancreatitis and the classification of gastroenteropancreatic neuroendocrine tumours.
