Winter School on Imaging Genetics

November 26-29, 2019
Verona

Speakers

André Altmann
University College London (UK)
Marco Lorenzi
Université Côte d'Azur, Inria (FR)
Fabrizio Pizzagalli
University of Southern Carolina (US)
Blaž Zupan
University of Ljubljana (SI)
Francesca Cordero, Marco Beccuti
University of Turin (IT)

School Directors

Rosalba Giugno, University of Verona
Gloria Menegaz, University of Verona
Carlo Combi, University of Verona

Organizing Committee

Vincenzo Bonnici, University of Verona
Luciano Cascione, Swiss Institute of Bioinformatics
Ilaria Boscolo Galazzo, University of Verona
Matteo Mantovani, University of Verona
Antonino Aparo, University of Verona
Samuele Cancellieri, University of Verona
Beatrice Amico, University of Verona

Imaging genetics is an emerging research field that embraces the neuroimaging and genetics communities and aims at blending the respective know-how and methodologies within a unified framework pursuing a holistic view of the human being.

The School on Imaging genetics aims at gathering the knowledge in the different fields that are touched by this topics providing the students a comprehensive view of this research area as well as awareness about the cutting-edge methodological, experimental and clinical aspects that are involved.
